

Barracuda Message Archiver

Comprehensive, easy to use and affordable message archiving solution.

The Barracuda Message Archiver is an integrated hardware and software solution designed to archive email communications sent and received by users throughout your organization. The Barracuda Message Archiver automatically stores and indexes all email messages in real-time while making them immediately available for rapid searching and retrieval by authorized users.

Satisfies Your Legal Requirements Immediately

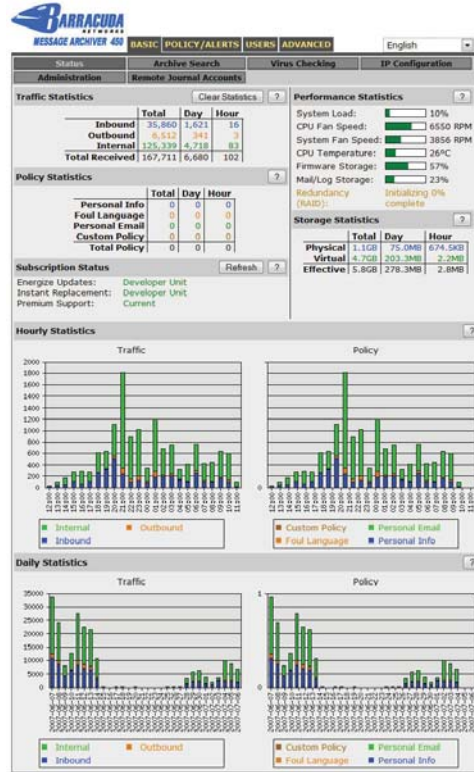

To capture new messages immediately, the Barracuda Message Archiver can take advantage of journaling features of Microsoft Exchange and other standards-based email servers. The Barracuda Message Archiver also has the ability to import historical emails and PST files. Right out of the box, you can satisfy any legal requirements to retain your email without the integration hurdles of software-only solutions or security and network implications when using hosted services.

To fulfill litigation demands, you can search the archives and create alerts for any emails that may violate either standard or custom policies. Through a sophisticated roles-based user interface and tamper-resistant storage, you can enforce internal access control policies that help you comply with corporate and compliance regulations.

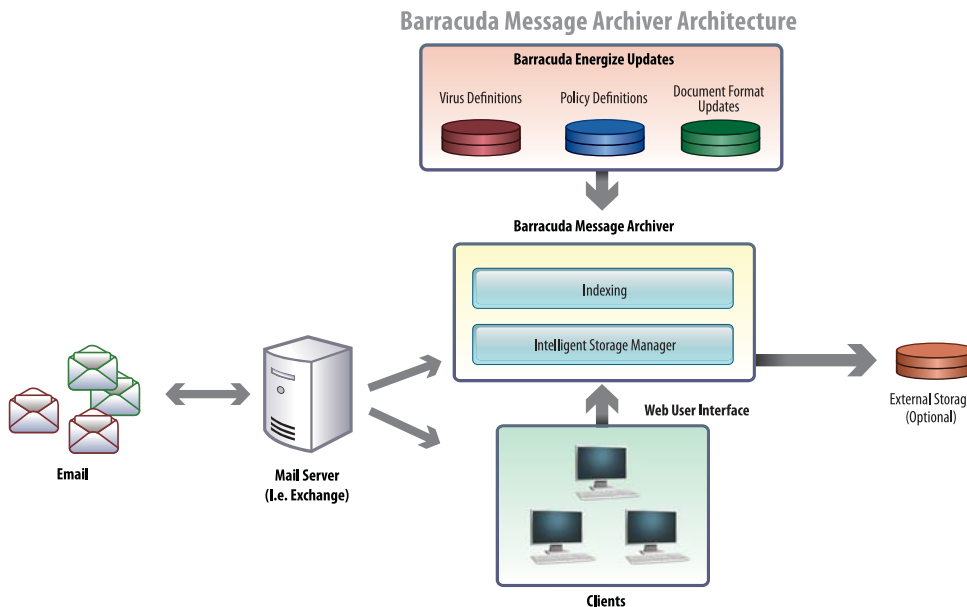

Cost-effective, Virtually Maintenance-Free Solution

Through both single-instance storage and compression, the Barracuda Message Archiver reduces your email storage costs. By enabling the migration of historical email and managing of smaller message stores in your production email environment, you can also achieve greater operational efficiencies. The Barracuda Message Archiver also takes advantage of Barracuda Networks' expertise in threat protection by ensuring that historical emails are scanned for viruses, spyware and other malware threats before they are retrieved.

Energize Updates keep the Barracuda Message Archiver up to date with the most current policy definitions for the monitoring of compliance regulations, updates to the latest document file formats needed to decode content within email attachments, and security updates against the latest vulnerabilities and malware threats. With no per user license fees, the Barracuda Message Archiver offers the most affordable enterprise-class message archiving solution available.

The Barracuda Message Archiver can archive and index messages and message attachments.

Typical Deployment Options

TECHNICAL SPECIFICATIONS

Key Features

COMPREHENSIVE ARCHIVING

- Retrieval from Exchange (MAPI)
- Integration with Exchange journaling
- Retrieval via IMAP and POP3
- Archival of SMTP messages
- Integration with Barracuda Spam Firewall
- PST file import / export
- Single-instance storage
- Compression of saved messages
- Tamper-proof storage

SEARCH AND RETRIEVAL

- Search on metadata
- Search on message contents
- Search through popular attachment formats
- Compound searches
- Saved searches
- Message tagging
- Export of search results

POLICY MANAGEMENT

- Standard policies
 - Severe foul language

- Workplace harassment
- Job searching
- Personally identifiable information
- Custom policies
- Alerts for every email that violates policy
- Periodic digests of emails violation policy
- Time-based retention policy
- Virus, spyware and malware scanning

INTELLIGENT STORAGE MANAGER

- Management of internal RAID array
- Mirroring to external storage
- Expansion to array with external storage
- Supports CIFS, NFS standards

ROLES-BASED INTERFACE

- Predefined administrator and auditor roles
- Granular access controls for access and policy
- End user access
- Integration with LDAP directory servers

REPORTING AND STATISTICS

- Email volume
- Storage utilization
- Policy violations

Hardware Features

CONNECTORS

- Standard VGA
- PS/2 keyboard/mouse
- Ethernet (see chart below)
- Serial port (DB-9)

POWER REQUIREMENTS

- AC input voltage 100-240 volts
- Frequency 50/60 Hz

Support Options

ENERGIZE UPDATES SUBSCRIPTION

- Standard technical support
- Policy definition updates
- Document definition updates
- Virus definition updates
- Security updates

INSTANT REPLACEMENT SERVICE

- Replacement unit shipped next business day
- 24x7 technical support
